

Medical endoscopes and cold light cables VUBU-Medical

Table of content

- Medical Endoscopes** 3 - 14
- Fiber light guides for halogen light sources**..... 15 - 16
- Cold light cable for LED light sources**..... 17 - 19
- Adapters for cold light cables Halogen / LED**..... 20 - 23

Medical Endoscopes > Medical Endoscopes

Endoscope width forward-oblique-optic 0°, 2,7mm diameter, 187mm lenth

Model:VUBU-027187-0

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: green. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width forward-oblique-optic 0°, 2,7mm diameter, 302mm lenth

Model:VUBU-027302-0

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: green. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width forward-oblique-optic 0°, 4,0mm diameter, 175mm lenth

Model:VUBU-040175-0

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: green. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width forward-oblique-optic 0°, 2,7mm diameter, 50mm lenth

Model:VUBU-027050-0

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: green. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width forward-oblique-optic 12°, 2,7mm diameter, 302mm lenth

Model:VUBU-027302-12

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass. Our endoscopes and instruments are compatible with nearly all established medical products.

Medical Endoscopes > Medical Endoscopes

Endoscope width forward-oblique-optic 12°, 2,9mm diameter, 302mm lenght

Model:VUBU-029302-12

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width forward-oblique-optic 12°, 4,0mm diameter, 301mm lenght

Model:VUBU-040301-12

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width forward-oblique-optic 30°, 10mm diameter, 314mm lenght

Model:VUBU-100314-30

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: red. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width forward-oblique-optic 30°, 2,7mm diameter, 187mm lenght

Model:VUBU-027187-30

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: red. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width forward-oblique-optic 30°, 2,7mm diameter, 302mm lenght

Model:VUBU-027302-30

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: red. Our endoscopes and instruments are compatible with nearly all established medical products.

Medical Endoscopes > Medical Endoscopes

Endoscope width forward-oblique-optic 30°, 2,9mm diameter, 302mm lenght

Model:VUBU-029302-30

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: red. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width forward-oblique-optic 30°, 3,0mm diameter, 110mm lenght

Model:VUBU-030110-30

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: red. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width forward-oblique-optic 30°, 4,0mm diameter, 110mm lenght

Model:VUBU-040110-30

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: red. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width forward-oblique-optic 30°, 4,0mm diameter, 142mm lenght

Model:VUBU-040142-30

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: red. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width forward-oblique-optic 30°, 4,0mm diameter, 175mm lenght

Model:VUBU-040175-30

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: red. Our endoscopes and instruments are compatible with nearly all established medical products.

Medical Endoscopes > Medical Endoscopes

Endoscope width forward-oblique-optic 30°, 4,0mm diameter, 301mm lenght

Model:VUBU-040301-30

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: red. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width forward-oblique-optic 30°, 4,0mm diameter, 50mm lenght

Model:VUBU-040050-30

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: red. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width forward-oblique-optic 30°, 5,0mm diameter, 300mm lenght

Model:VUBU-050300-30

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: red. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width forward-oblique-optic 30°, 5,0mm diameter, 450mm lenght

Model:VUBU-050450-30

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: red. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width forward-oblique-optic 30°, 2,7mm diameter, 50mm lenght

Model:VUBU-027050-30

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: red. Our endoscopes and instruments are compatible with nearly all established medical products.

Medical Endoscopes > Medical Endoscopes

Endoscope width forward-oblique-optic 45°, 10mm diameter, 314mm length

Model:VUBU-100314-45

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: black. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width forward-oblique-optic 45°, 2,7mm diameter, 187mm length

Model:VUBU-027187-45

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: black. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width forward-oblique-optic 45°, 4,0mm diameter, 175mm length

Model:VUBU-040175-45

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: black. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width forward-oblique-optic 45°, 5,0mm diameter, 314mm length

Model:VUBU-050300-45

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: black. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width forward-oblique-optic 45°, 5,0mm diameter, 450mm length

Model:VUBU-050450-45

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: black. Our endoscopes and instruments are compatible with nearly all established medical products.

Medical Endoscopes > Medical Endoscopes

Endoscope width forward-oblique-optic 70°, 2,7mm diameter, 302mm length

Model:VUBU-027302-70

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: yellow. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width forward-oblique-optic 70°, 2,9mm diameter, 302mm length

Model:VUBU-029302-70

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: yellow. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width lateral-optic 30°, 3,0mm diameter, 110mm length

Model:VUBU-030110-70

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: yellow. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width lateral-optic 70°, 2,7mm diameter, 110mm length

Model:VUBU-027110-70

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: yellow. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width lateral-optic 70°, 2,7mm diameter, 175mm length

Model:VUBU-027175-70

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: yellow. Our endoscopes and instruments are compatible with nearly all established medical products.

Medical Endoscopes > Medical Endoscopes

Endoscope width lateral-optic 70°, 2,7mm diameter, 187mm lenght

Model:VUBU-027187-70

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: yellow. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width lateral-optic 70°, 4,0mm diameter, 110mm lenght

Model:VUBU-040110-70

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: yellow. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width lateral-optic 70°, 4,0mm diameter, 175mm lenght

Model:VUBU-040175-70

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: yellow. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width lateral-optic 70°, 4,0mm diameter, 301mm lenght

Model:VUBU-040301-70

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: yellow. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width straight-forward-optic 0°, 2,7mm diameter, 110mm lenght

Model:VUBU-027110-0

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: green. Our endoscopes and instruments are compatible with nearly all established medical products.

Medical Endoscopes > Medical Endoscopes

Endoscope width straight-forward-optic 0°, 2,7mm diameter, 175mm lenght

Model:VUBU-027175-0

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: green. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width straight-forward-optic 0°, 2,9mm diameter, 302mm lenght

Model:VUBU-029302-0

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: green. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width straight-forward-optic 0°, 3,0mm diameter, 110mm lenght

Model:VUBU-030110-0

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: green. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width straight-forward-optic 0°, 4,0mm diameter, 110mm lenght

Model:VUBU-040110-0

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: green. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width straight-forward-optic 0°, 4,0mm diameter, 301mm lenght

Model:VUBU-040301-0

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: green. Our endoscopes and instruments are compatible with nearly all established medical products.

Medical Endoscopes > Medical Endoscopes

Endoscope width straight-forward-optic 0°, 4,0mm diameter, 50mm lenght

Model:VUBU-040050-0

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: green. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width straight-forward-optic 0°, 5,0mm diameter, 300mm lenght

Model:VUBU-050300-0

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: green. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width straight-forward-optic 0°, 5,0mm diameter, 450mm lenght

Model:VUBU-050450-0

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: green. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width straight-forward-optic 0°, 5,5mm diameter, 488mm lenght

Model:VUBU-055500-0

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: green. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width straight-forward-optic 30°, 10mm diameter, 314mm lenght

Model:VUBU-100314-0

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: green. Our endoscopes and instruments are compatible with nearly all established medical products.

Medical Endoscopes > Medical Endoscopes

Endoscope width straight-forward-optic 30°, 2,7mm diameter, 110mm lenght

Model:VUBU-027110-30

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: red. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width straight-forward-optic 30°, 2,7mm diameter, 175mm lenght

Model:VUBU-027175-30

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: red. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width straight-forward-optic 30°, 5,5mm diameter, 488mm lenght

Model:VUBU-055500-30

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: red. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width straight-forward-optic 45°, 2,7mm diameter, 175mm lenght

Model:VUBU-027175-45

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: black. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width straight-forward-optic Weitwinkel 0°, 2,7mm diameter, 110mm lenght

Model:VUBU-027110-0W

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: green. Our endoscopes and instruments are compatible with nearly all established medical products.

Medical Endoscopes > Medical Endoscopes

Endoscope width straight-forward-optic Weitwinkel 30°, 2,7mm diameter, 110mm length

Model:VUBU-027110-30W

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: red. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width wide-angel-lateral-optic 70°, 2,7mm diameter, 110mm length

Model:VUBU-027110-70W

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: yellow. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width wide-angel-lateral-optic 70°, 4,0mm diameter, 175mm length

Model:VUBU-040175-70W

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: yellow. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width wide-angle-forward-oblique-optic 0°, 4,0mm diameter, 175mm length

Model:VUBU-040175-0W

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: green. Our endoscopes and instruments are compatible with nearly all established medical products.

Endoscope width wide-angle-forward-oblique-optic 30°, 4,0mm diameter, 175mm length

Model:VUBU-040175-30W

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: red. Our endoscopes and instruments are compatible with nearly all established medical products.

Medical Endoscopes > Medical Endoscopes

Endoscope width wide-angle-forward-oblique-optic 45°, 4,0mm diameter, 175mm length

Model:VUBU-040175-45W

Autoclavable, fiber optic light transmission, extraordinarily scratch-resistant because of outer windows made out of sapphire glass, color code: black. Our endoscopes and instruments are compatible with nearly all established medical products.

Medical Endoscopes > Fiber light guides for halogen light sources

3.5 / 4.8 x 2300mm Y-Fiber Optic Light Cable Standard glued 1x endoscope connector 2x projector connector

Model:VUBU-KL-00-21210-61

3.5 / 4.8 x 2300mm Y-Fiber Optic Light Cable Standard glued 2x endoscope connector 1x projector connector

Model:VUBU-KL-00-21210-60

Bonded 3.5 x 1800mm Fiber Optic Light Cable Standard glued

Model:VUBU-KL-00-21110-60

Bonded 3.5 x 2300mm Fiber Optic Light Cable Standard glued

Model:VUBU-KL-00-21110-61

Bonded 3.5 x 3000mm Fiber Optic Light Cable Standard glued

Model:VUBU-KL-00-21110-63

Medical Endoscopes > Fiber light guides for halogen light sources

Bonded 3.5 x 3500mm Fiber Optic Light Cable Standard glued

Model:VUBU-KL-00-21110-62

Bonded 4,8 x 1800mm Fiber Optic Light Cable Standard glued

Model:VUBU-KL-00-21210-66

Bonded 4,8 x 2300mm Fiber Optic Light Cable Standard glued

Model:VUBU-KL-00-21110-67

Bonded 4,8 x 3000mm Fiber Optic Light Cable Standard glued

Model:VUBU-KL-00-21210-63

Bonded 4,8 x 3500mm Fiber Optic Light Cable Standard glued

Model:VUBU-KL-00-21210-62

Medical Endoscopes > Cold light cable for LED light sources

3.2 / 3.5 x 1800mm high-performance cold light cable LED

Model:VUBU-KL-00-23330-30

3.2 / 3.5 x 2300mm high-performance cold light cable LED

Model:VUBU-KL-00-23330-40

3.2 / 3.5 x 3000mm high-performance cold light cable LED

Model:VUBU-KL-00-23330-50

3.2 / 3.5 x 3500mm high-performance cold light cable LED

Model:VUBU-KL-00-23330-55

4.5 / 4.8 x 1800mm high-performance cold light cable LED

Model:VUBU-KL-00-23230-30

Medical Endoscopes > Cold light cable for LED light sources

4.5 / 4.8 x 2300mm high-performance cold light cable LED

Model:VUBU-KL-00-23230-40

4.5 / 4.8 x 3000mm high-performance cold light cable LED

Model:VUBU-KL-00-23230-50

4.5 / 4.8 x 3500mm high-performance cold light cable LED

Model:VUBU-KL-00-23230-55

5,8/6,0 x 1800mm high-performance cold light cable LED

Model:VUBU-KL-00-23430-30

5,8/6,0 x 2300mm high-performance cold light cable LED

Model:VUBU-KL-00-23430-40

Medical Endoscopes > Cold light cable for LED light sources

5,8/6,0 x 3000mm high-performance cold light cable LED

Model:VUBU-KL-00-23430-50

5,8/6,0 x 3500mm high-performance cold light cable LED

Model:VUBU-KL-00-23430-55

Medical Endoscopes > Adapters for cold light cables Halogen / LED

Endoscope side - Adapter for ACM British Stryker
Model:VUBU-KL-00-21010-67

Endoscope side - Adapter for Olympus SPECIAL EDITION
Model:VUBU-KL-00-21010-95

Endoscope side - Adapter for RFQ Storz Aesculap
Model:VUBU-KL-00-21010-71

Endoscope side - Adapter for Schott Zeiss colposcope
Model:VUBU-KL-00-21013-09

Endoscope side - Adapter for Stryker headlamp
Model:VUBU-KL-00-21013-74

Medical Endoscopes > Adapters for cold light cables Halogen / LED

Endoscope side - Adapter for Wolf HSW Dyonics clip
Model:VUBU-KL-00-21010-74

Endoscope side - Adapter for Wolf HSW Dyonics snap
Model:VUBU-KL-00-21010-76

Projector side - Adapter for Fuji
Model:VUBU-KL-00-21119-62

Projector side - Adapter for Heine Optotechnik
Model:VUBU-KL-00-21113-03

Projector side - Adapter for Olympus SPECIAL EDITION
Model:VUBU-KL-00-21116-63

Medical Endoscopes > Adapters for cold light cables Halogen / LED

Projector side - Adapter for Olympus standard
Model:VUBU-KL-00-21116-62

Projector side - Adapter for Pentax
Model:VUBU-KL-00-21119-65

Projector side - Adapter for RFQ Storz, Aesculap
Model:VUBU-KL-00-21110-70

Projector side - Adapter for Schott Zeiss colposcope
Model:VUBU-KL-00-21113-06

Projector side - Adapter for Winter & Ibe
Model:VUBU-KL-00-21110-72

Medical Endoscopes > Adapters for cold light cables Halogen / LED

Projector side - Adapter for Wolf HSW Dyonics

Model:VUBU-KL-00-21110-74

Projector side - Adapter for Zeiss surgical microscope

Model:VUBU-KL-00-21113-07

Projector side - Adapter for ACM British Stryker

Model:VUBU-Schutzhuelle-ENDO

Projector side - Adapter for ACM British Stryker

Model:VUBU-KL-00-21110-66
