

Cat Condos

Lubb's Cat Condos have been designed by and for veterinarians, so they are prepared to comfortably accommodate animals in need of medical care and assist veterinarians in this important function.

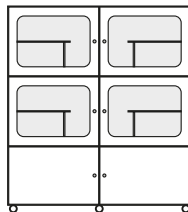

These Cat Condos are robust, have a simple and secure latch, are waterproof, maintenance is very simple and much of the surface of the door has transparent acrylic,

with clearance from the door to ensure adequate ventilation, without compromising the safety of the animal.

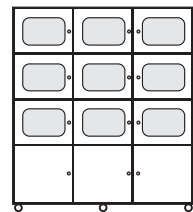

We haven't forgot the felines, they will find at their disposal a comfortable, airy space with a transparent window and a platform to appreciate what is going on around them as they like so much.

Condomínio de Luxo
