

IREST SUPEARL (A336)

MULTIPLE MASSAGE FUNCTIONS IN A BEAUTIFUL DESIGN

Packed with innovative features specific to the high-end model group, the **iRest Supearl (A336)** massage chair provides an exceptional level of comfort during each massage session:

- The **massaging arms** operate in 2D from the neck down to the thighs along the SL-type linear guide, which enables better alignment with the natural curvature of the spine.
- The massage experience is also amplified by the **Zero Gravity** position. When the chair reclines, the muscles at the spine are relieved and any tension is gently reduced.
- The **heating** feature also provides a particularly pleasant massage. The warmth flowing across your back makes it easier to massage your muscles and guarantees extraordinary relaxation.
- This unique massage is complemented by the **automatic stretching programme** that gently stretches the body and relieves tension accumulated both in the back section and in the legs.
- One extremely useful feature is the **Zero Wall**, whereby the chair, when positioned against a wall, will automatically move away from the wall when reclining.
- The chair is controlled via a convenient, intuitive **remote control**, a **handy built-in control panel** and **voice control** in English.

All in all, the iRest Supearl (A336) is ideal for those who want a deeply relaxing massage contained in a stylish and modern design.

Key features of iRest Supearl:

- **12** automatic programmes, **6** groups of massage techniques, speed adjustable in **5** levels;
- **Stretching massage** - a specially designed automatic programme that gently stretches the body and alleviate tension in the back and leg area with great sensitivity.
- **Zero Wall** - a feature that allows the chair to be placed almost up against a wall. When reclining, the chair automatically moves away from it.
- **SL- shape** - the massaging arms move from the neck all the way down to the thighs following an SL-type linear guide for a perfectly tailored massage.
- **Heating** - considered to be the most enjoyable feature, it warms up the body and makes it easier to massage and eliminate any aches and pains that may occur.
- **Zero Gravity** - an outstanding massage position in which the muscles around the spine are relaxed and the massage experience becomes more comfortable.
- **Roller foot massage** - the feet get massaged with airbags and massage rollers, and when combined with a kneading calf massage, the feeling of heavy legs is effectively alleviated;
- **Airbag massage** - airbags surrounding the shoulders, calves and feet stimulate blood and lymph circulation in these parts and effectively remove any accumulated tension.
- **Controls** - it is possible to control all functions of the massage chair via remote control, built-in control panel and by voice control in English.
- **Bluetooth, USB and wireless charging** - your massage session can be complemented by your favourite stress-relieving background music. In addition, a wireless charging function and a USB port are at your disposal.
